CONSTRUCTION

The saddle stands and saddle racks manufactured by Jorge Kurczyn are designed to support your saddle in the most perfect way. The majority of our saddle stands are embellished with hand forged iron accessories to tie the designs to the western theme. Copper panels may also adorn the saddle stands, and the panels are hand hammered and tooled with western designs for greater personality. Our horse accessories are handcrafted from solid timber, and they are the best in the market. You be the judge.

CONSTRUCTION

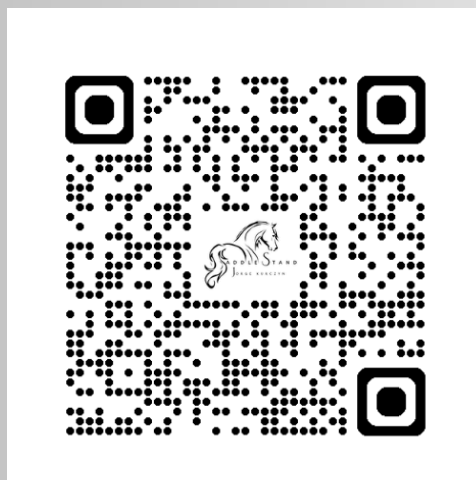

If you are not sure about a style, send us a photo of your saddle or tell us what you have in mind. We can help you choose a style or we can custom make one for you, including the horse accessories.

Our saddle stands are designed to resemble a horse's back. It does not matter how big your saddle is, it will be a perfect fit. In fact, the saddle stands are so well designed that your saddle will not rollover. The saddle will always sit straight even with a saddle blanket. The saddle stands are made to allow you to climb on and enjoy your saddle, as demonstrated by Jorge Kurczyn in the adjoining photos. The design of the saddle stand also lets you use a cinch to secure the saddle for better safety.

"We are vaqueros"
Together with our
workers, we're very
familiar with the love of
our saddles.
